

## Geological Development & Hydrocarbon Habitat of the Precaspian Basin

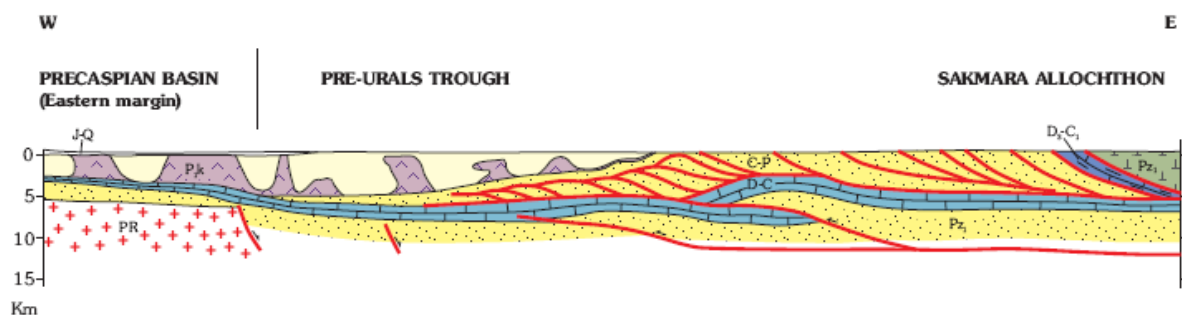

### Blackbourn Geoconsulting

presents a summary of the geological development and hydrocarbon habitat of the Precaspian Basin.

The report begins with a general description of the geology and development of the Precaspian Basin as a whole. This is followed in turn by consideration of the development of its northern, eastern and southwestern margins. The contents of the report include:

- Geological Development of the Precaspian Basin
- Outline of the Petroleum Geology of the Precaspian Basin
- Development of the Northern Margin of the Precaspian Basin and Southern Volga-Urals Platform
- Development of the Eastern Margin of the Precaspian Basin

*Schematic cross-section across the southern segment of the Urals Thrust Belt and the Eastern Precaspian*
