

PETROLEUM GEOLOGY AND HYDROCARBON POTENTIAL OF THE LAPTEV SEA

EXECUTIVE SUMMARY

PART I: Geology of the Laptev Sea and Surrounding Areas; Structure, Stratigraphy and Palaeogeographic Development

I.1. Overview of the Laptev Sea: its Geography and Climate

- I.1.1 Description of the report
- I.1.2 Brief description of the Laptev Sea and its coastal belt; geography and climate
- I.1.3 Brief introduction to the petroleum geology of the Laptev Sea

I.2. The Palaeozoic and Mesozoic Development of the Laptev Sea and Adjacent Regions of Northern Siberia

- I.2.1 The Laptev terrane
- I.2.2 The Kotel'nyi terrane
- I.2.3 The Chelyuskin and Pronchishev terranes and Kara block

I.3. Cenozoic of the Laptev Sea and Development of the Laptev Sea Rift System

- I.3.1 General characteristics of the Laptev Sea Rift system
- I.3.2 Cenozoic successions onshore around the Laptev Sea
- I.3.3 Seismic reflection surveys over the Laptev Sea
 - Interpretation of LARGE seismic lines*
 - Interpretation of BGR seismic lines*
- I.3.4 Discussion on the development of the Laptev Sea Rift system
 - Ust'-Lena Rift
 - Laptev Horst and Anisyi Basin
- I.3.5 Summary

PART II: Petroleum Geology of the Laptev Sea

II.1 Mesozoic and Older Prospectivity

II.2 Cenozoic Prospectivity

II.2.1 Reservoir

II.2.2 Seals

II.2.3 Traps

II.2.4 Source rocks and hydrocarbon generation

II.3 Summary of Laptev Sea Prospectivity

ENCLOSURES

LIST OF FIGURES AND ENCLOSURES

- Figure I.2.1 Schematic diagram showing the main tectonic features of North Siberia and adjacent areas of the Arctic Ocean
- Figure I.2.2 MAGE 87722 seismic line from Olenek Bay, to the west of the Lena delta, illustrating the Mesozoic acoustic basement stepping down into the Ust'-Lena Rift
- Figure I.3.1 Comparison of onshore Cenozoic sections from the Yana-Indigirka Lowland and the New Siberian Islands with units recognised from offshore seismic and with regional tectonic events
- Figure I.3.2 Development of the Laptev Sea rift system during the Cenozoic in relation to surrounding tectonic terranes
-
- ENCLOSURE 1 General topographic and location map of the Laptev Sea and surrounding areas
- ENCLOSURE 2 Generalised onshore geology of the areas around the Laptev Sea
- ENCLOSURE 3 Main basins and other structures recognised beneath the Laptev Sea
- ENCLOSURE 4 Simple gravimetric and magnetic anomaly map of the Laptev Sea area
- ENCLOSURE 5 Seismic grid showing locations of the MAGE, LARGE, SMNG/BGR and some other seismic lines shot in the region of the Laptev Sea
- ENCLOSURE 6 Interpretations from LARGE seismic profiles
- ENCLOSURE 7 Interpretations from BGR seismic profiles
- ENCLOSURE 8 Depth to Horizon LS1 (top-Mesozoic folded basement)
- ENCLOSURE 9 Relative thickness of succession down to Horizon LS-3 (mid-Miocene)
- ENCLOSURE 10 Relative thickness of succession between horizons LS3 and LS2 (SU-4, between mid-Miocene and Eocene-Oligocene boundary)
- ENCLOSURE 11 Relative thickness of succession between horizons LS2 and LS1 (SU-3 + SU-2 + SU-1, between Eocene-Oligocene boundary and top-Mesozoic folded basement)
