PETROLEUM GEOLOGY AND HYDROCARBON POTENTIAL OF THE YENISEI-KHATANGA TROUGH, NORTHERN SIBERIA.

EXECUTIVE SUMMARY

PART I: Geology of the Yenisei-Khatanga Trough and surrounding areas; structure, stratigraphy and palaeogeographic development.

I.1. Overview of the Yenisei-Khatanga Trough, its Geography and Climate

- I.1.1 Description of the report
- I.1.2 Brief description of the North Siberian Lowlands and adjacent areas; geography and climate
- I.1.3 Brief historical review of the hydrocarbon industry in the Yenisei-Khatanga Trough, and a short introduction to the petroleum geology of the area

I.2. The Tectonic Development of Northern Siberia.

- I.2.1 Palaeozoic and older development of the North Siberian Platform and the Taimyr Fold Belt.
- I.2.2 Rifting and trap formation at the Permian-Triassic boundary and initiation of subsidence in the Yenisei-Khatanga Trough.
- I.2.3 Cretaceous closure of the South Anyui/Angayucham Basin and structural reconfiguration of the Yenisei-Khatanga Trough.

I.3. Development of the Yenisei-Khatanga Trough during the Mesozoic; Palaeogeography and Stratigraphy.

- I.3.1 Triassic
- I.3.2 Jurassic
 - I.3.2.1 Early and Middle Jurassic
 - I.3.2.2 Late Jurassic
- I.3.3 Cretaceous
 - I.3.3.1 Neocomian
 - I.3.3.2 Aptian, Albian and Late Cretaceous

I.4. Description of Individual Sub-Basins and other Structural Elements.

- I.4.1 Gydan Arch
- I.4.2 Pendomayakha Trough
- I.4.3 Bolshaya Kheta Arch
- I.4.4 Tanama Arch
- I.4.5 Malaya Kheta Arch
- I.4.6 Nosok Trough (Ust'-Yenisei Trough)
- I.4.7 Agapa Trough
- I.4.8 Rassokha Arch
- I.4.9 Zhdanikha-Dudypta Trough
- I.4.10 Balakhnya Arch & Kiryaka-Tas Step
- I.4.11 Summary of the structural development of the Yenisei-Khatanga Trough

PART II: Petroleum Geology of the Yenisei-Khatanga Trough

II.1 Known hydrocarbon fields and accumulations in the Yenisei-Khatanga Trough

II.2 Elements of hydrocarbon systems within the Yenisei-Khatanga Trough

- II.2.1 Reservoirs
- II.2.2 Source rocks
- II.2.3 Seals
- II.2.4 Thermal maturity and migration
- II.2.5 Trap types
- II.2.6 Hydrocarbon types

II.3 Hydrocarbon prospectivity of the Yenisei-Khatanga Trough
